SERHII LYZUN

Senior Full-Stack Engineer (React / Node.js)

Ukraine | Open to Remote & Relocation (EU, USA)

serhii.lyzun@gmail.com | GitHub: github.com/serhii-lyzun | LinkedIn: linkedin.com/in/serhii-lyzun

EXECUTIVE SUMMARY

Senior Full-Stack Engineer with 9+ years building React, Node.js and TypeScript products end to end, from REST APIs and databases to responsive UIs. Contributed 4 of a logistics platform's 8+ sub-systems, solely building Stripe billing (+5% new B2C customers per year, client-confirmed). Leads teams of 1–5 and delivers ~40% faster with AI-assisted engineering (est.).

SKILLS

Backend & APIs: Node.js, Express, REST API design, GraphQL/Apollo, PostgreSQL, MySQL, MongoDB, DynamoDB, Prisma, Stripe (billing, subscriptions, payments), crypto payments (NowPayments.io), npm package development.

Frontend: TypeScript, JavaScript, React.js, Next.js, React Hooks, Redux/Redux Toolkit, React Native (Google Play / App Store publishing), Storybook, Material-UI, Tailwind CSS, Styled Components, HTML5, CSS3/Sass, responsive / mobile-first UI, accessibility (WCAG 2.1, ARIA), web performance (Core Web Vitals, Lighthouse, code-splitting).

Security: Authentication & Authorization, OAuth 2.0 / OIDC, JWT, SSO, XSS/CSRF/CSP protection.

Cloud & CI/CD: AWS (S3, Amplify, EC2, Elastic Beanstalk, IAM), Firebase, Docker, CI/CD (GitHub Actions, Bitbucket Pipelines, Azure DevOps), Sentry, AWS CloudWatch.

Testing & Quality: Jest, React Testing Library, unit/snapshot testing, code reviews, ESLint, Prettier.

AI Engineering: LLM APIs (Anthropic, OpenAI), RAG, MCP (client/server), AI agents, AI chatbots, Claude Code, Cursor, GitHub Copilot.

Integrations & Analytics: Excel Add-ins (Office Add-ins), HERE Maps, Leaflet, Google Analytics, AppsFlyer, SEO.

Tools & Process: Git, Vite, Webpack, monorepo, Figma (design handoff), Jira, Confluence, Agile/Scrum, Kanban.

Domains: Logistics, healthcare, investment, AI, e-commerce, social networks.

Languages: Ukrainian (native), English (professional).

EXPERIENCE

Intellias — Aug 2019 – Present

AI-enabled product engineering company (founded 2002, HQ Chicago, 1,000–5,000 employees) building and scaling digital platforms for mobility, logistics, healthcare, and financial services clients, with a focus on AI-enabled engineering and generative AI.

Lead/Senior Full-Stack JavaScript Engineer (React/Node.js) — Apr 2022 – Present

Project: Logistics platform of 8+ sub-systems (web app, Excel Add-in, Node.js services, npm packages, AI and MCP tooling) for route planning and B2B/B2C customer billing; contributed 4 of them.

USA (Remote)

- Contributed 4 of the platform's 8+ sub-systems: led 2 (Excel Add-in; Map SDK on npm + docs site) and solely built 2 (Stripe billing; AI agent & MCP tools).
- Solely designed and built Stripe subscription billing with a 14-day free trial (React, Node.js), automating B2C payments end to end; +5% new B2C customers per year after launch (client-confirmed).
- Led a team of 2 (~50% hands-on) to ship a custom Excel Add-in (Office Add-in) that helped the client land 2 additional major B2B customers (client-confirmed).
- Built an Anthropic Model Context Protocol (MCP) client and server tools for an AI chatbot, shortening onboarding so new customers could start using the platform right away.
- Led and mentored teams of 1–5 engineers, setting code-quality standards through code reviews and technical guidance; ~30% higher team velocity (story points, est.).
- Introduced agentic engineering with Claude Code and Claude Skills/Agents as development tools; ~40% faster delivery of comparable user stories (est.), reducing the client's need for extra hires (client-confirmed).

Stack: Node.js, Express, React.js, TypeScript, Redux Toolkit, REST API, Stripe, LLM APIs (Anthropic, OpenAI), RAG, Docker, monorepo, Vite, Material-UI, HERE Maps, Leaflet, OAuth 2.0/OIDC, JWT, SSO, XSS/CSRF/CSP protection, Sentry, AWS CloudWatch, Azure DevOps CI/CD, Jira, Scrum/Agile.

Senior JavaScript Engineer (React) Dec 2020 – Apr 2022

Project: Logistics web platform for a German client, delivered from MVP with map-based features (HERE Maps) and a reusable Storybook component library.

Germany (Remote)

- Led the team of 5 and contributed to all features, including the team's reusable Storybook component library covering ~70% of the UI, which standardized design patterns and sped up delivery of new screens.
- Led the team to 80%+ unit and snapshot test coverage with Jest and React Testing Library, so regression checks run automatically on every change.
- Delivered the full MVP in under 6 months, enabling the customer to validate the idea early.
- Led a team of 5 across Ukraine and Germany, driving knowledge sharing.

Stack: React.js, TypeScript, Redux, REST API, Storybook, Jest, React Testing Library, Material-UI, HERE Maps, Sentry, AWS CloudWatch, Bitbucket Pipelines CI/CD, Jira, Scrum/Agile.

Lead/Senior JavaScript Engineer (React) Aug 2019 – Dec 2020

Project: Healthcare self-assessment web application for the Saudi Arabian market with bilingual Arabic/English (RTL) support, launched as an MVP on an accelerated schedule.

Saudi Arabia (Remote)

- Delivered a bilingual healthcare self-assessment MVP in six months, leading a team of 2, under an accelerated launch schedule, enabling the client to validate the product in the Saudi Arabian market.
- Reused a custom UI/UX library via npm, saving ~4 sprints of development.

Stack: React.js, Redux, Ant Design, CSS Modules, Jest, accessibility (WCAG 2.1, ARIA), Bitbucket Pipelines CI/CD, Scrum/Agile.

Limestone Digital **Mar 2018 – Aug 2019**

Software development company (founded 2016, HQ Prague, 51–200 employees) that builds web, mobile, and AI products for businesses in finance, lending, and insurance.

React.js/Redux Developer Mar 2018 – Aug 2019

Projects: Investment platform (responsive, mobile-first web app for a German client), a customizable chatbot for a financial website, and an AI web application built from scratch.

Germany (Remote)

- Investment platform: built a fully responsive, mobile-first UI down to 320px for a user base that was 60%+ mobile, shipping the MVP in 3 months with an on-site team in Germany.
- Chatbot project: delivered a highly customizable financial website chatbot solo in 2 weeks from almost no technical requirements, with a customization interface that let the client reuse it across use cases.
- AI project: built a web app from scratch from general requirements only, using Material-UI throughout so no dedicated designer was needed.

Stack: React.js, Redux, Material-UI, Styled Components, Chart.js, Webpack, ESLint, Prettier, Scrum/Agile.

ItUa **Sep 2017 – Mar 2018**

Kyiv-based web development and IT company (founded 1995, 11–50 employees) delivering e-commerce, corporate websites, and CRM/ERP integrations for its clients.

Frontend Developer Sep 2017 – Mar 2018

Projects: Landing pages, e-commerce stores, and corporate websites for ItUa clients, delivered in about 1 week per customer.

Kyiv, Ukraine (On-site)

- Delivered landing pages, e-commerce stores, and corporate websites with a full turnaround of about 1 week per customer, and 1-day landing-page adaptations on request.
- Partnered with backend developers on WordPress and Bitrix for a more reliable product.

Stack: HTML5, SASS, Less, BEM, JavaScript, jQuery, Waterfall.

Ltd “2click” **2012 – 2017**

Ukrainian self-service payment terminal network supporting bank payments, mobile top-ups, and more than 1,000 services nationwide.

Technical Support 2012 – 2017

Project: Self-employed operator of a self-service payment terminal network — set up, configured, and maintained terminals and the supporting IT infrastructure.

Ukraine (On-site)

- Configured network protocols, operating systems, software, and hardware across the network, supporting 10+ pieces of hardware infrastructure daily to keep business hours stable.

INDEPENDENT / FOUNDER PROJECTS (part-time, alongside full-time employment)

Senior Full-Stack Engineer — Solo Founder Apr 2026 – Present

Project: Face Search (fasesift.com) — pay-per-search reverse face-search web service with crypto payments, built and run solo.

Remote

- Owned the whole delivery of a $1-per-search reverse face-search service — Next.js web app and server, MySQL, crypto payments — keeping infrastructure costs under $60/month.
- Created and maintained an SEO blog that grew search traffic by ~20% per month.

Stack: Next.js, TypeScript, MySQL, NowPayments.io, TailwindCSS, 3rd-party reverse image search API, GitHub Actions CI/CD, Authentication & Authorization.

React Native Developer — Solo Founder Oct 2019 – Dec 2024

Project: Dating App — cross-platform dating product (web, Google Play, App Store) with its own backend, built and marketed solo.

Remote

- Built a web app, Node.js/GraphQL server, and cross-platform React Native app (Google Play + App Store) in parallel for a faster release, keeping infrastructure costs under $50/month.
- Integrated Google Analytics, Firebase, and AppsFlyer to track the full customer funnel from first interaction to purchase.

Stack: React Native, TypeScript, GraphQL/Apollo, Node.js, MongoDB, AWS (S3, Amplify, DynamoDB, EC2, Elastic Beanstalk, IAM), GitHub Actions CI/CD, OAuth 2.0/OIDC.

EDUCATION

- National Technical University of Ukraine “KPI” — Faculty of Electronics, Bachelor's degree (incomplete) — Kyiv, 2004–2007
    - After three years of study, moved into startup work, programming automation for trading systems on U.S. stock markets.

COURSES & CERTIFICATIONS

- Agentic Engineering Course — SULICOM AI Academy — September 2026
- React.js/Redux Advanced Course — Mate Academy, Kyiv — 2018
